OVERVIEW

Machine Learning, Big Data, Spatial Data Analysis, Shrinkage *and* Penalized Estimation, Statistical Inference, High Dimensional Data, Functional Data Analysis.

SKILLS

Professionally R coding and programming, Professionally SPSS programming

BRIEF RESEARCH STATEMENT

The focus of my research is on improving parameter estimation. I and my co-authors have published papers related to shrinkage and pretest estimations in linear and partially linear models. We also combined these techniques with some robust estimations. Furthermore, I have been working on improving penalized estimation methods for high-dimensional data, big data and spatial data problems. Such problems can be found in areas like computer science, social science, biometrics, finance, network security, social media analysis, and industrial applications. These problems bring not only new opportunities to the understanding of data but also new challenges to data analysis, such as noise accumulation, spurious correlations, heavy computational cost, and algorithmic instability. In order to tackle these challenges, I have been working on not only developing the theory but also implementing algorithms in the R and C++ languages. I am also professionally working on coding my studies in R for publishing in CRAN.

I am also deeply interested in doing collaborative research in each area rather than just in my main interest.

APPOINTMENTS

Sessional Instructor Professor

Jan-May 2025

Simon Fraser University, Department of Statistics and Actuarial Science, Burnaby, Canada

- Applied Discrete Data Analysis STAT 475 / STAT 675

Visiting Professor

July 2024-July
2025

Simon Fraser University, Department of Statistics and Actuarial Science, Burnaby, Canada

- Machine Learning for Functional Data with Prof. Jiguo Cao

Professor of Statistics

2023-

İnönü University, Department of Econometrics, Malatya, Turkey

Visiting Associate Prof. <i>The University of British Columbia, Department of Statistics, Vancouver, Canada</i>	Feb – Aug 2019
<ul style="list-style-type: none"> • Robust Penalized Estimation in Network Data with Prof. Ruben H. Zamar 	
Associate Professor of Statistics <i>İnönü University, Department of Econometrics, Malatya, Turkey</i>	2017-2023
Visiting Assist. Prof. <i>Brock University, Department of Mathematics & Statistics, St. Catharines, Canada</i>	May–June 2016
<ul style="list-style-type: none"> • High-Dimensional Estimation Strategies with Prof. S. Ejaz Ahmed 	
Assistant Professor of Statistics <i>İnönü University, Department of Econometrics, Malatya, Turkey</i>	2015–2017
Visiting International Scholar(PhD Research) <i>Brock University, Department of Mathematics & Statistics, St. Catharines, Canada</i>	2013–2014
<ul style="list-style-type: none"> • Shrinkage and penalized estimation strategies with Prof. S. Ejaz Ahmed 	
Research Assistant <i>İnönü University, Department of Econometrics, Malatya, Turkey</i>	2009–2014

EDUCATION

Associate Professorship Degree in Econometrics	March/2024
Associate Professorship Degree in Statistics	December/2017
PhD in Mathematics (In English) <i>İnönü University, Malatya, Turkey</i>	2010–2014
<p>“Penalty and non-penalty estimation strategies for linear and partially linear models” Thesis advisors: Mehmet Güngör (İnönü University) & S. Ejaz Ahmed (Brock University)</p>	
MS in Mathematics (In Turkish) <i>Fırat University, Elazığ, Turkey</i>	2008–2010
<p>“Generalized Statistical Convergence”</p>	
BS in Mathematics <i>Fırat University, Elazığ, Turkey</i>	2004–2008

SOFTWARE EXPRIENCE

- A3. **Yüzbaşı, B.** & Cao, J. (2025, to be appear), sglasso R package that is written by C++, RcppArmadillo language.
- A2. **Yüzbaşı, B.**, Arashi, M., & Akdeniz, F. (2019). [rbridge: Restricted Bridge Estimation](#). R package version, 1(0). It is written by C++, RcppArmadillo language. For more detail, we refer to Yüzbaşı et al. (2021). Penalized regression via the restricted bridge estimator, *Soft Computing*, 25(13), 8401-8416.
- A1. SPSS, it is given a number of courses and is analysed of papers related to Social or Medicine science of research.

PROJECTS, SCHOLARS, AWARDS AND GRANTS

- “Machine Learning for Functional Data”, THE SCIENTIFIC AND TECHNOLOGICAL RESEARCH COUNCIL OF TURKIYE (TUBITAK) 2219 International post doctoral research scholarship, Place: Simon Fraser University, Department of Statistics and Actuarial Science, Canada. 2024-2025, 12 months. (As Coordinator), Budget: 31.200 USD.
- “Investigation of Domestic and Foreign Migration of Van Province by Geographical Weighted Regression Method”, TUBITAK 3005 - Innovative Solutions Research Projects Support Program in Social Sciences and Humanities, Project Number: 122G128, 01.010.2022–05.04.2024. (As Coordinator), Budget: 327.137 Turkish Liras.
- “Shrinkage and penalized estimation strategies”, TUBITAK 2214-A - International Research Fellowship Programme for PhD Students, Place: Brock University, Department of Mathematics and Statistics, Canada. 2013-2014, 12 months. (As Coordinator), Budget: 15.600 USD.
- “Robust Regularization and Gaussian Graphical Models”, Inonu University, International Bilateral Cooperation Project with number SUA-2019-1629, Place : The University British Columbia, Department of Statistics, Canada. 02.2019–08.2019. (As Coordinator), Budget: 7500 USD.
- “Pretest and Stein-type estimation in Linear Quantile Regression Models”, Inonu University Scientific Research Project with number SBA-2017-946, 12.2017–09.2018. (As Coordinator)
- “Liu-type estimation in linear regression models”, Necmettin Erbakan University Scientific Research Project with number 171215001, 03.2017–12.2017. (As Researcher)
- [THE FIELDS INSTITUTE, University of Toronto](#), Toronto, Canada, 2016, congress attendance grant.

BOOK

- B2. Ahmed, SE, Ahmed, F & **Yüzbaşı, B.**, (2023) Post-shrinkage strategies in statistical and machine learning for high dimensional data. Chapman and Hall/CRC, London. (Routledge and CRC Press of Taylor & Francis Group)

2. Committee member of International Symposium on Big Data and Applied Statistics (ISBDAS), Guangzhou, China, November 2018.

TEACHING EXPERIENCE

I taught undergraduate courses in experimental design, probability, categorical data analysis, mathematical Mathematical Statistics, regression analysis, linear Linear Algebra, numerical analyses, multivariate statistics, and introduction to statistics. I also taught courses in statistical methods, including machine learning and big data, at the master's and PhD levels..
